WORK EXPERIENCE

Freelance Developer
Binary Holdings   **December 2023 - March 2024**

- Developed and integrated a favorites feature allowing users to favorite events within the mobile application utilizing the Ionic framework.
- Wrote and tested comprehensive API calls to manage the favoriting functionality.
- Implemented efficient data handling techniques to minimize server load and enhance response time.

Freelance Project/IT Support
University of Personal Fitness   **April 2022 - June 2024**

- Managed the smooth operation of a diverse range of devices, including laptops, tablets, projectors, and audio equipment.
- Developed and deployed a custom web application that streamlined client management for a martial arts school, improving operational efficiency.
- Implemented a tracking system for monitoring clients' belt progression, ensuring accurate and up-to-date records of their achievements.
- Integrated secure authentication and data protection measures to safeguard sensitive client information.

EDUCATION

Univerity of South Carolina
Bachelor of Science In Computer Science - Major
Retail Management - Minor

RELEVANT PROJECTS

Capstone Computer Project
Team Member   **August 2022 - May 2023**

- Collaborated with a team of 5 to design and create Makelist: a web application that allows users to customize their grocery list based on preferences where I implemented features such as Login/Sign-Up, profile customization, and dietary restriction while utilizing SCRUM methodology.

Learning Management System Project
Team Member
                                                                     January 2023 - May 2023
- Collaborated with a team of 4 where I worked as a developer in the design, development, and delivery of a Learning Management System using SCRUM methodology.

PERSONAL PROJECTS

Lua Platformer/Shooter
Implemented Physics components and collision detection VIA Love engine.

Donation Integration System:
Integrated PayPal's donation API into a website to facilitate user donations using SQL and PHP.
